Forecast for Friday 29 Nov 2024

Weather: Partly cloudy with some low cloud and drizzle at times particularly around mountains further south and west. A few bright or sunny spells developing especially in the north. Cloud will thicken in the afternoon with some moderate spells of rain expected by late afternoon.

Chance of cloud-free hill tops above 800m: 40%, more chance further north during the day becoming 10% for a time during the evening.

Low Cloud and visibility: Low cloud layers will soon become broken above 500m around southern mountains but more scattered above 700m in the north. Cloud will become more extensive later in the afternoon from the west. Visibility will be good for much of the day, perhaps turning moderate in drizzle in the south at times and later in the day as rain arrives.

Freezing Level*	2600m	2500m	2400m	2500m	2100m	2100m	1900m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Windy conditions will make for fairly arduous walking on exposed terrain with buffeting of clothing. Balance may be affected at times with additional layers required given a wind chill at height. Poor visibility will also require good navigational skills.

Forecast for Saturday 30 Nov 2024

Weather: Often cloudy with hill tops shrouded, especially through the late afternoon. Cloud breaking into the northeast of the park to give sunnier breaks. Patchy drizzle at times, but largely dry with a few heavier showers arriving into the evening. Feeling milder.

Maximum wind: Southerly 40-45 mph gusting 50 mph.

Chance of cloud-free hill tops above 800m: 40%, though 60% to the northeast in cloud breaks.

Low Cloud and visibility: Low cloud down to 400-500m, breaking to the east of the park. Generally good visibility but poor in low cloud or drizzle.

Temperature: **Valleys:** Plus 12 rising to plus 14 Celsius.
At 800m: Plus 8 Celsius.
Freezing level: Above summits.
